

PM-642 BAJA T.A.

TOTAL ALKALINITY CORRECTOR

PM-642 BAJA T.A. is a dry granular acid which is highly soluble. It is easy to apply and it doesn't leave residues. Its main properties are:

- Alkalinity effective corrector.
- It keeps chlorine active.
- It clarifies water.

METHOD OF USE AND DOSAGE:

- Determine the alkalinity of the water with a Test-Kit.
- If the alkalinity is greater than 150 ppm add 25 g/m³ of product by each 10 ppm that is wanted to reduce.
- Divide the dose in 3 parts and add them every 6 – 8 hours. By this way we will reduce the alkalinity, but not the pH.
- Distribute the product throughout the pool. Filter must be turn on and work for at least one hour.
- Do not add the product at the same time as the disinfectant.

PHYSICAL PROPERTIES:

- Appearance: White crystalline solid
- Odour: Odourless
- pH: 1.0 – 1.4 (10% solution)
- Density: 2.44 (20 °C)
- Melting point: 179 °C
- Decomposition temperature: 460 °C
- Solubility in water: 1050 g/L (25 °C)

HAZARDS AND PRECAUTIONARY STATEMENTS:

- Causes serious eye damage.
- Keep out of reach of children.
- Do not eat, drink or smoke when using this product.
- Do not get in eyes, on skin, or on clothing. Wear protective gloves, eye protection and face protection.
- If exposed or if you feel unwell: Immediately call a poison centre or doctor/physician. If medical advice is needed, have product container or label at hand.

PACKAGING:

3, 8, 25 Kg containers.
